

Aii Virtual Classroom

Grades 1-4

There is so much happening in the world around you, and students like you can be a part of it! Do you want to be an inventor some day? Maybe even the president? Get started by learning the basics about technology, innovation, and infrastructure!

#LearnWithAii

What is Infrastructure?

Aii educates to encourage future leaders and innovators. This lesson will encourage kids to learn about things they see around them.

Time: 15 minutes

Materials: Computer, phone, or tablet; white paper, colored pencils

Action: Read the lesson and begin!

Step 1: With a parent or guardian's permission, use a computer or phone to look up the definition for the word **infrastructure** and write it down at the top of your paper

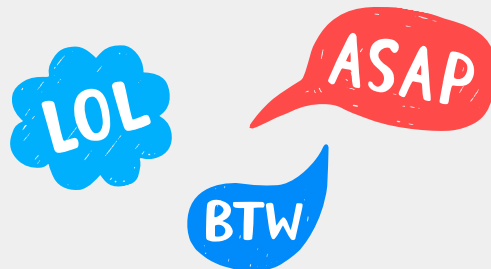

Step 2: Using the **definition only**, brainstorm ideas of what you think may constitute as infrastructure and write down 5 of them below the definition, each in a different color

Step 3: Look up each of your words and whichever ones qualify as infrastructure draw them below using the color you used to write the word

Step 4: Next time you're in the car or walking around with your family, point out as many examples of infrastructure that you can!

What is an acronym?

"Aii" is an **acronym**. This means that "Aii" is an abbreviation formed from the first letters of each word. Together, "Aii" stands for **A**lliance for **I**nnovation and **I**nfrastructure.

Parents: If you wish to learn more about our nation's infrastructure, visit Aii.org/Issues.
