

**ALLIANCE FOR INNOVATION
AND INFRASTRUCTURE**

Advancing Innovation for Infrastructure Excellence

What Aii Brings to Partnership

Research • Convene • Educate • Engage

Develop independent, data-driven **research** and issue briefs.

Convene experts, infrastructure leaders, regulators, policymakers, and practitioners.

Translate complicated infrastructure questions into useful **educational** resources.

Bring evidence and practical insight into **engage** public-policy and industry discussions.

Aii is the **Only** Nationwide Public Policy **Think Tank** Dedicated to **Infrastructure**.

Innovation comes first.

We examine how infrastructure can be made safer, more efficient, and more resilient by rethinking technology, policy, governance, incentives, and investment.

We advance all-of-the-above approaches to infrastructure, transportation, clean energy expansion, and more.

Mission

Foster innovative solutions
to current and future
infrastructure challenges

Vision

Advance innovation across
industry and public policy
to improve the safety,
efficiency, and resilience of
our nation's infrastructure

Values

Collaboration
Excellence
Innovation
Integrity
Safety

Start with First Principles

Innovation First

Challenge assumptions and consider better ways to think, plan, govern, invest, and build.

Govern Complexity

Infrastructure systems cross jurisdictions, technologies, markets, regulations, and institutions.

Align Incentives

Durable solutions work when public and private actors have incentives that reinforce better outcomes.

Manage Risk

Good infrastructure policy recognizes, allocates, and reduces risk rather than pretending it can be eliminated.

Scale What Works

Focus on practical, sustainable solutions that can move beyond a pilot, slogan, or political cycle.

How We Pursue Our Mission

Research

White papers, policy briefs, surveys, data analysis, legal and regulatory research.

Convene

Roundtables, panels, private dialogues, expert webinars, stakeholder discussions.

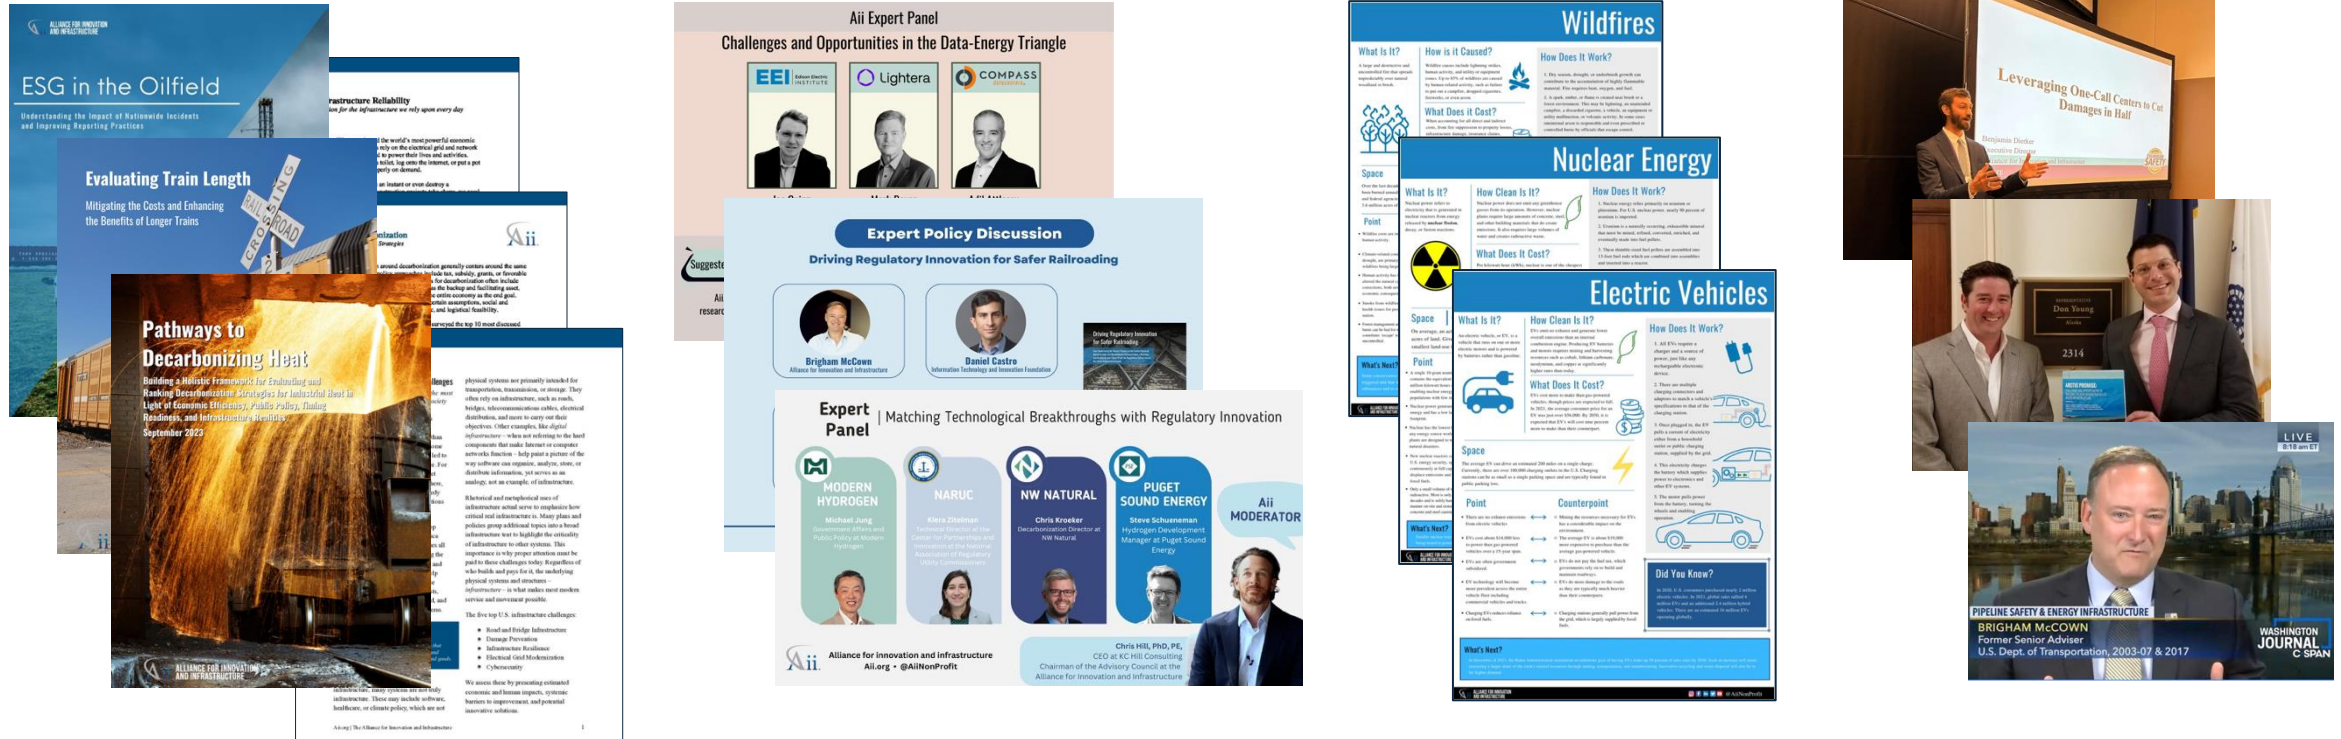

Educate

Lawmaker and regulator briefings, industry education, informational graphics, explainers, testimony, presentations.

Engage

Regulatory comments, conferences, media, OpEds, public outreach, direct stakeholder dialogue.

Current Issue Areas

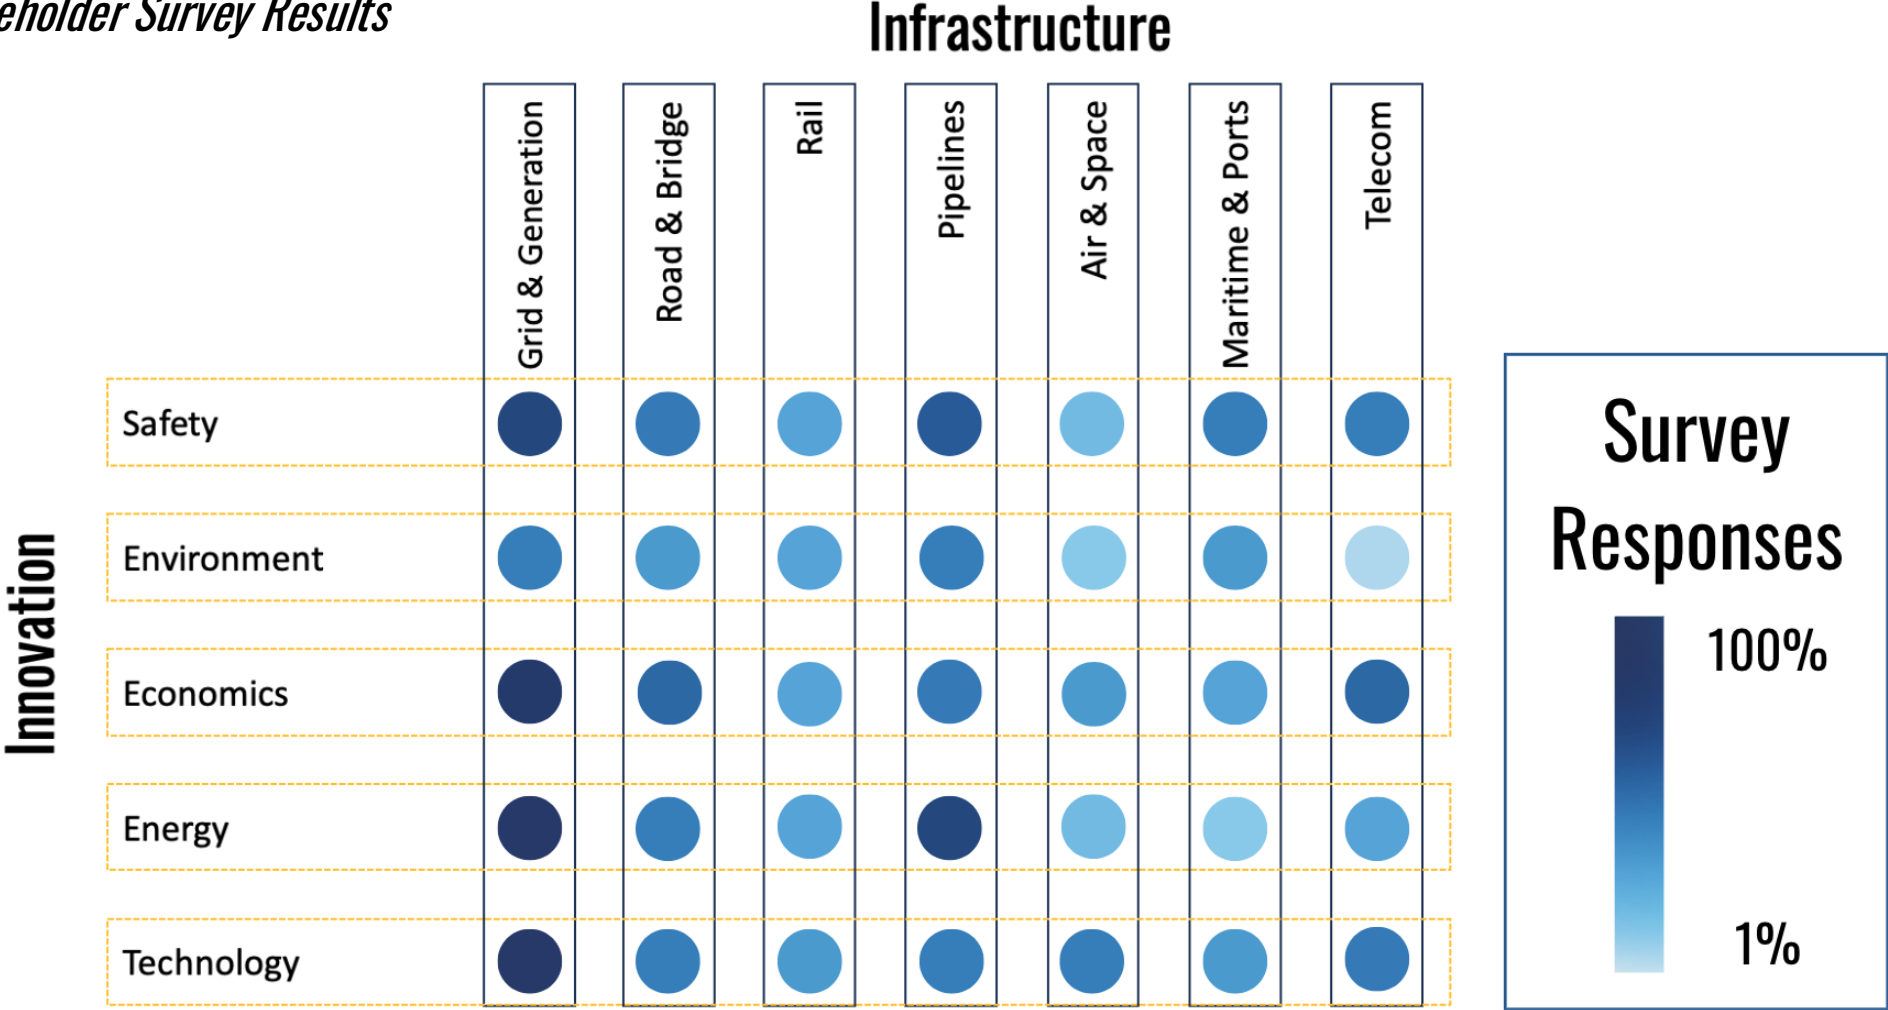

- Climate and Conservation
- Damage Prevention
- Eminent Domain
- Energy Infrastructure
- Innovation and Technology
- Transportation Infrastructure

These Issue Areas fit intersections of **Innovation** and **Infrastructure** and serve as broad categories for our research and educational activities. Donors, Partners, and the Public help inform this through surveys.

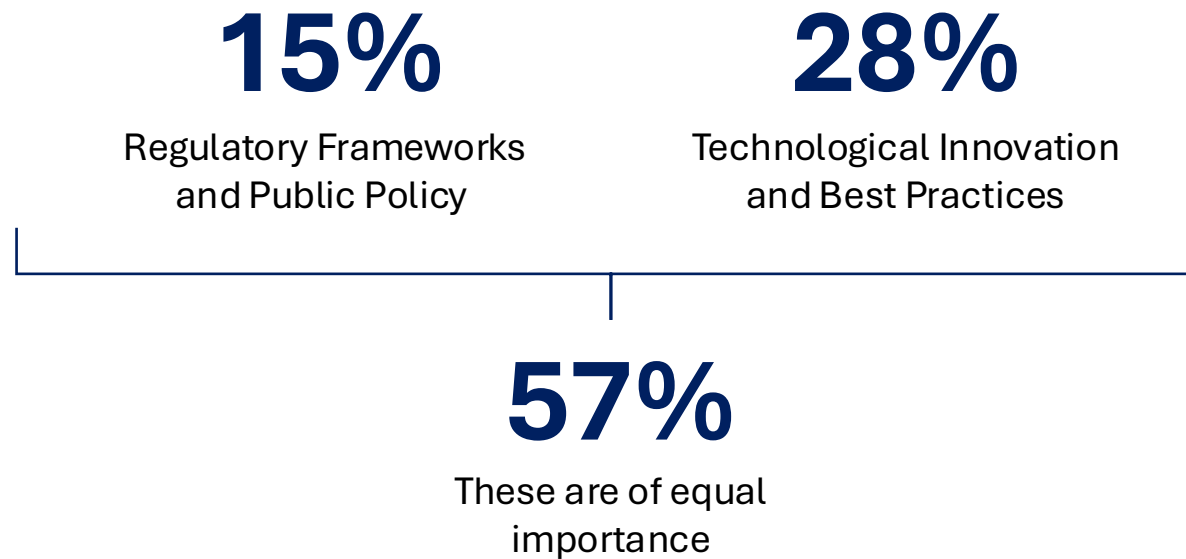

2027 Issue Heat Map

2027 Stakeholder Survey Results

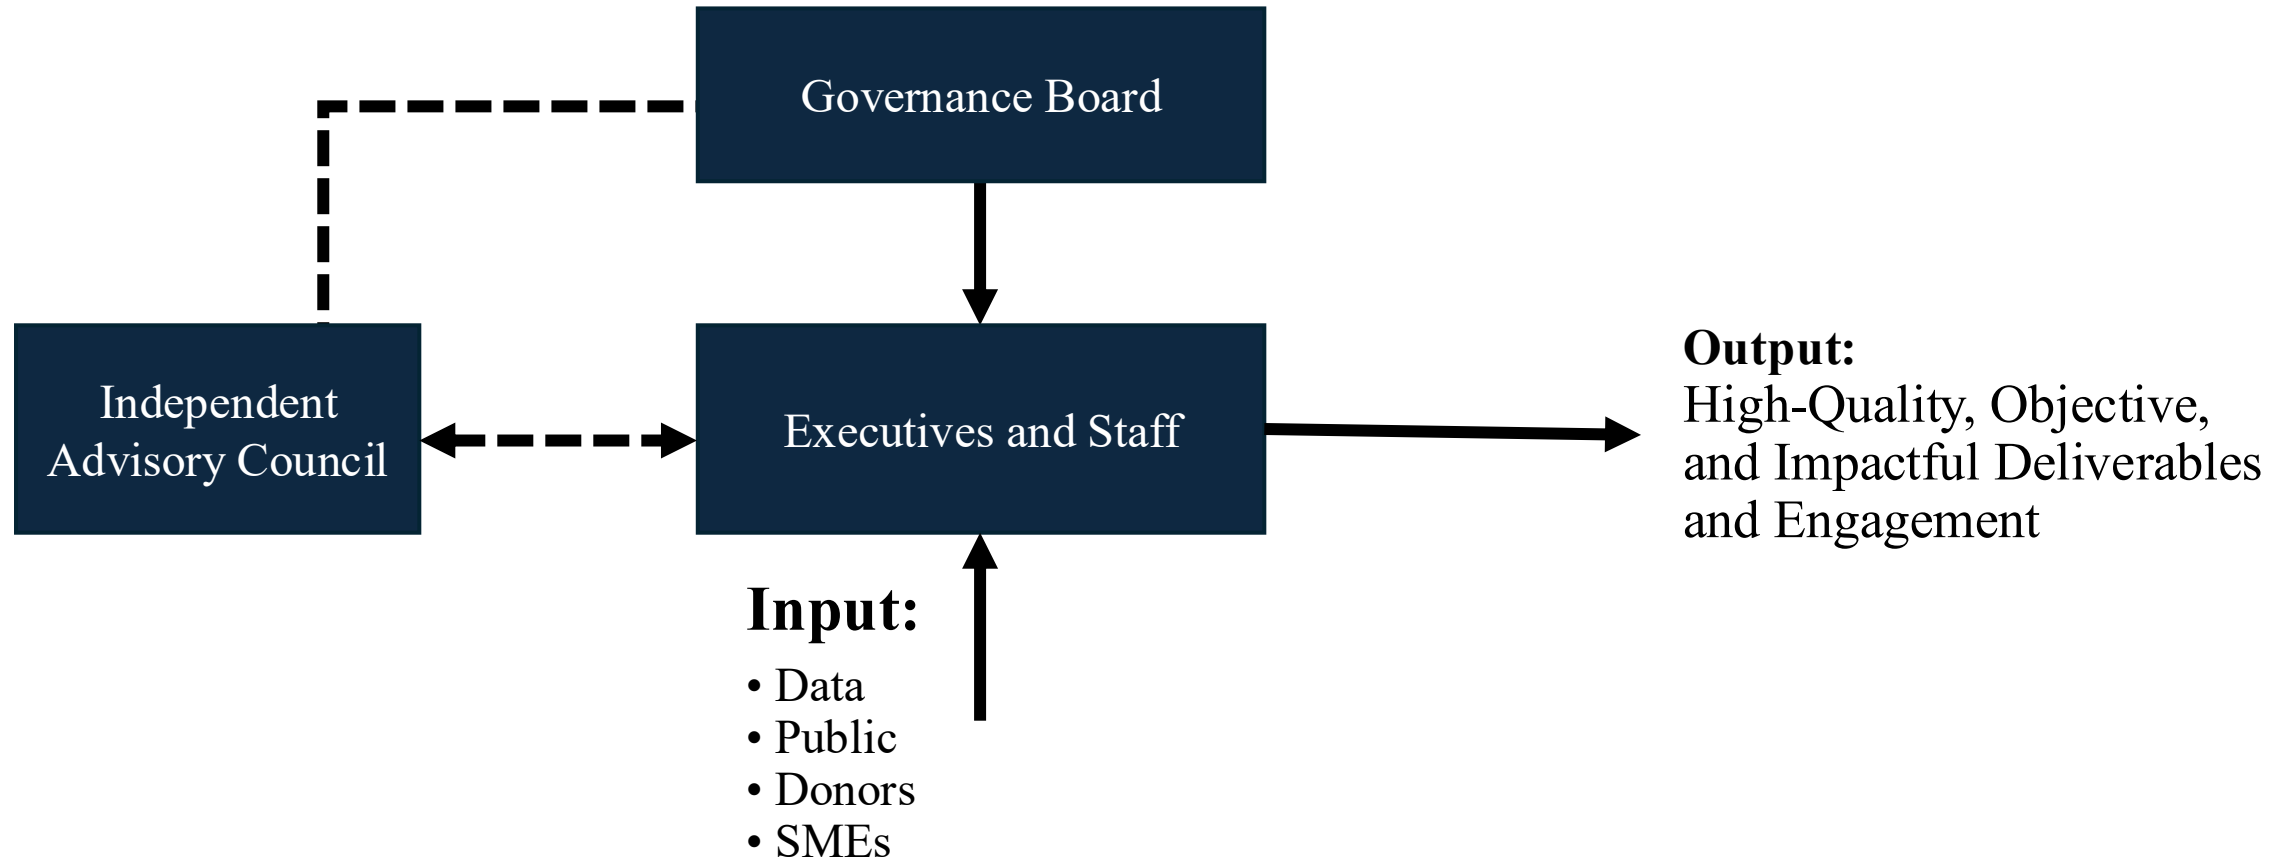

Aii Strategic Focus

2027 Stakeholder Survey Results

Aii works where technological innovation, infrastructure operations, and public policy intersect.

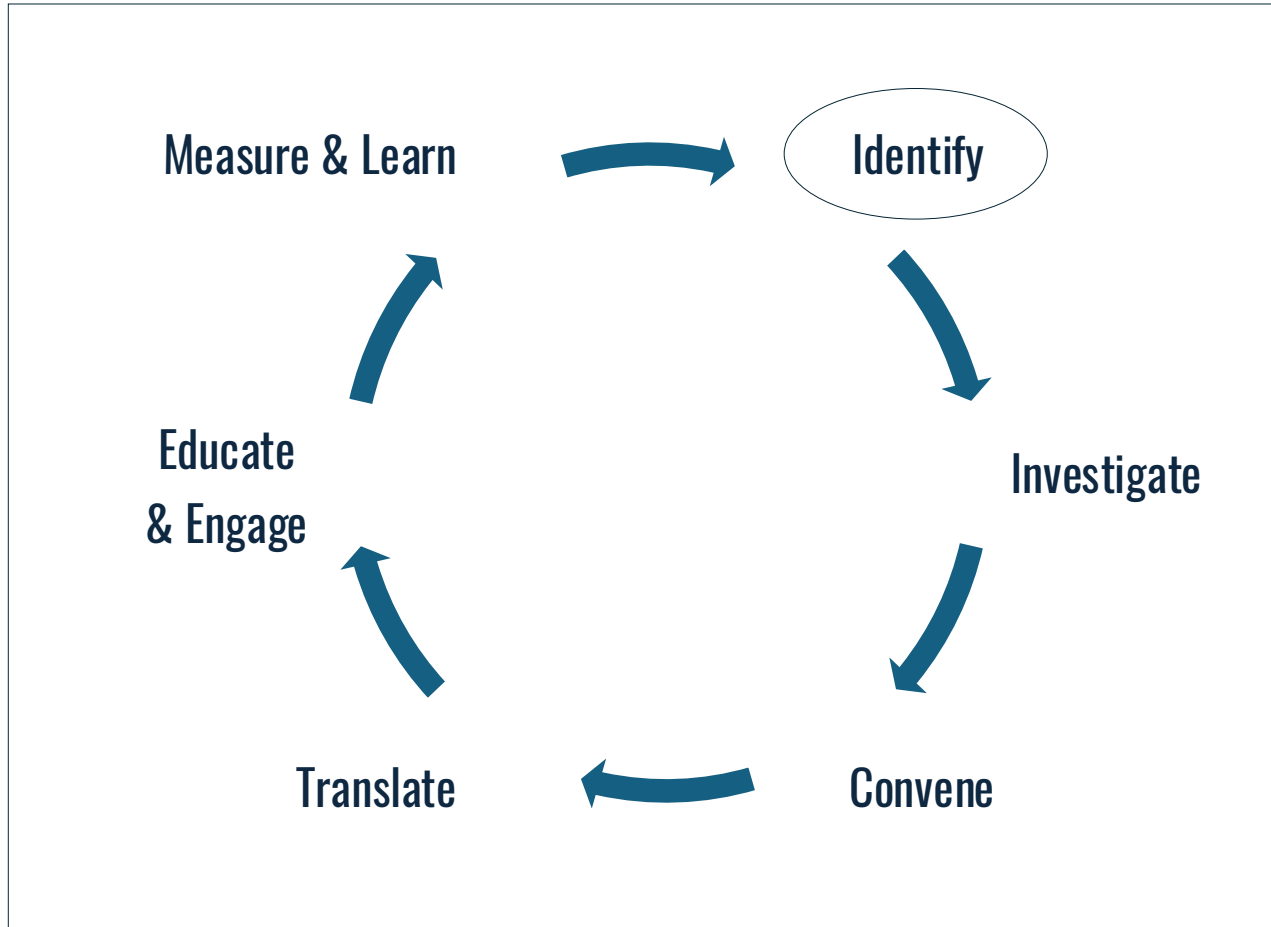

Aii Structure

Input is not control.

Partners, experts, operators, policymakers, and data inform Aii's work.
Aii retains independent judgment over its analysis, programming, and conclusions.

How Aii Creates Impact

Identify

Emerging challenges, stakeholder questions, policy developments, operational problems.

Investigate

Data, research, legal and regulatory analysis, expert input.

Convene

Bring together competing perspectives, practitioners, policymakers, regulators, innovators, and experts.

Translate

White papers, issue briefs, one-pagers, graphics, explainers, testimony.

Educate & Engage

Lawmaker briefings, regulator engagement, industry discussions, webinars, panels, conferences, media.

Measure & Learn

Track citations, policy developments, industry adoption, stakeholder response, and new questions.

FUND THE QUESTION.

NOT THE CONCLUSION.

You have an important infrastructure question. Fund Aii to independently answer it.

An infrastructure stakeholder can identify an important problem, contribute relevant data and expertise, and provide the resources necessary to study it. Aii independently determines what the evidence supports.

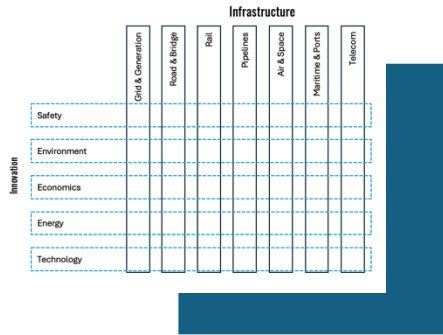

Funding makes the research possible. It does not purchase the outcome.

Partnership Can Take Many Forms

Research & Analysis White papers, issue briefs, benchmarking, economic analysis, policy evaluation, surveys.	Convening & Dialogue Roundtables, private discussions, public panels, expert webinars, stakeholder working sessions.
Education & Translation Policymaker briefings, regulator education, industry resources, explainers, presentations.	Thought Leadership & Engagement Conferences, regulatory participation, media, OpEds, public discussion, emerging-issue leadership.

A partnership may support one project, one issue area, or Aii's broader capacity to do all of the above.

Ways to Partner with Aii

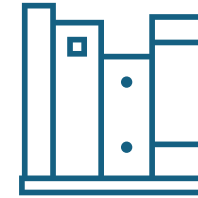

General Mission Support

Support Aii because independent infrastructure research, education, convening, and public engagement are worth sustaining.

Strategic Partnership

Organizations that build, own, operate, finance, regulate, oversee, insure, supply, or depend on major infrastructure systems provide **sustained support** for Aii's broader work while contributing expertise, perspective, data, and participation in dialogue.

Project & Research Support

Fund a specific white paper, issue brief, convening series, educational initiative, research question, or other mission-aligned project.

Why Organizations Partner with Aii

Strong partners help make independent work possible.

Independence is what makes that work valuable.

Independent Credibility

Aii is not the communications department of a company, association, agency, or political constituency.

Infrastructure Expertise

Aii already understands the systems, institutions, policies, and technologies involved.

A Trusted Table

Aii can convene people who may approach the same problem from different institutional and political perspectives.

Policy Reach

Aii educates lawmakers, regulators, industry leaders, media, and the public rather than leaving useful findings inside a report.

Long-term Capacity

Strategic and general support allow Aii to respond to issues before there is a contract, grant, or crisis attached to them.

Help Shape the Next Decade of Infrastructure.

Support the mission. Join the dialogue. Bring us a challenge worth solving.
