Aii is the Nation's Only Infrastructure Think Tank

The Alliance for Innovation and Infrastructure – or Aii – sits at the intersection of infrastructure, innovation, and public policy.

As an independent national think tank, we help bring greater clarity to complex infrastructure challenges and elevate practical ideas that can improve how essential systems are planned, built, operated, and governed.

Our work is grounded in the belief that better infrastructure depends on better information, open exchange, and a willingness to test assumptions. Aii provides an independent platform for examining emerging issues and translating them into constructive public-policy dialogue.

Across our work, the objective is consistent: advance innovation that makes infrastructure safer, more efficient, and more resilient while supporting economic opportunity and quality of life.

The Aii Mission

Our mission is to foster innovative solutions to current and future infrastructure challenges.

Who We Are

Aii is an independent, nonpartisan research and educational organization focused on the systems, policies, and technologies that shape American infrastructure.

Our work spans transportation, energy, technology, infrastructure safety, environmental issues, economics, and other areas where innovation and public policy affect infrastructure outcomes. We bring together legal, economic, technical, operational, and policy perspectives to examine challenges that often cross traditional industry and government boundaries.

What We Do

Aii turns complex infrastructure questions into practical, accessible research and educational resources. We conduct independent research and analysis and produce white papers, issue briefs, data analysis, explainers, commentary, and other materials that help policymakers, industry leaders, media, and the public better understand consequential infrastructure issues.

We also convene and engage policymakers, regulators, practitioners, industry leaders, academics, innovators, and other experts through briefings, roundtables, panels, webinars, conferences, and direct dialogue. Our role is to ask important questions, test assumptions, consider competing perspectives, and follow the evidence toward findings and recommendations that can improve infrastructure policy and performance.

How to Cite Aii

Aii is an independent, nonpartisan think tank. Aii is **not** an industry group, trade organization, or special interest lobby.

When citing our work, refer to the first use as the “Alliance for Innovation and Infrastructure.” Subsequent mentions should be “Aii.” When using our abbreviated name (pronounced as three separate letters: A-i-i), the “A” is always capitalized, while both “i”s remain lowercased. There are no periods in the abbreviated name Aii.

How to Find Aii

Visit Aii.org or search our handle on social media: @AiiNonProfit

Aii by the Numbers

- Aii was founded in **2014**
- **6** core areas of research
- Over **500** policy blogs providing critical analysis
- **2** original annual campaigns:
 - Modern Roots March and August Energy Month
- **100+** original research reports, including policy briefs and white papers

Aii Logos

Trusted by **over 100** outlets and counting

Invited onto podcasts, radio, and cable news | Quoted in both online and print journalism | Cited in both textbooks and journals

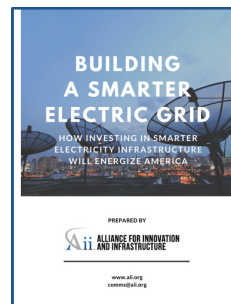

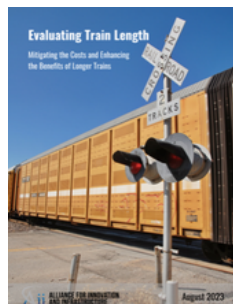

MEDIA MENTIONS

Aii experts are available for interviews upon request. For availability, comments on our research, or permission to reprint Aii material, please contact Benjamin Dierker at info@aii.org.

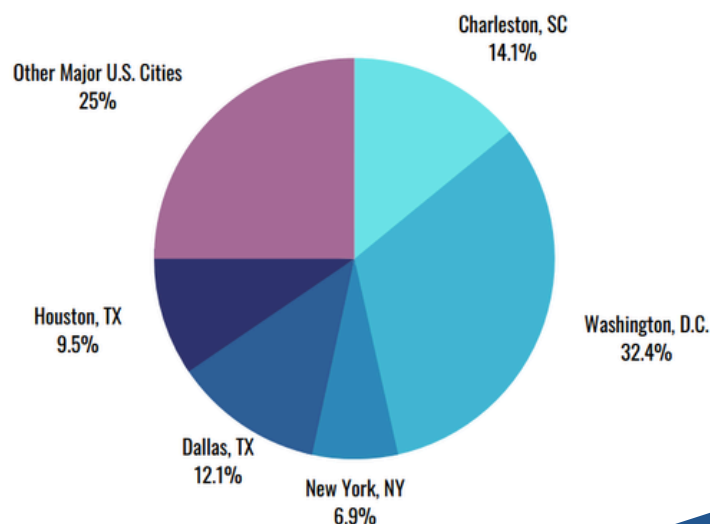

Aii Research

Aii regularly publishes research covering a range of topics relating to infrastructure, energy, technology, transportation, and more.

Our Audience

With a primary audience in Washington, D.C. and core readership and networks across major infrastructure and energy hubs around the nation, Aii is uniquely positioned to inform, educate, and influence decisionmakers and public policy professionals.

Aii in Action

Aii hosts and participates in conferences, panels, and events across the world, bringing experts together and engaging with the critical issues of the day.

Testimonials

“Working with Aii has been such a great experience. I’ve learned so much about infrastructure, innovation and the importance of sustainable growth in the industry. Getting to research and write about new topics has been the best part for me. My time with Aii has been incredibly valuable and I can’t wait to see how it impacts my career after graduation!” **Rachel Spencer, former intern**

“This internship was a very fulfilling experience. Having my own writing and now soon my own multimedia projects published online is a big accomplishment to me and something I hope to utilize in my future. I really felt like I was part of the team for my entire experience, everything was enriching.” **Jake Smith , former intern**

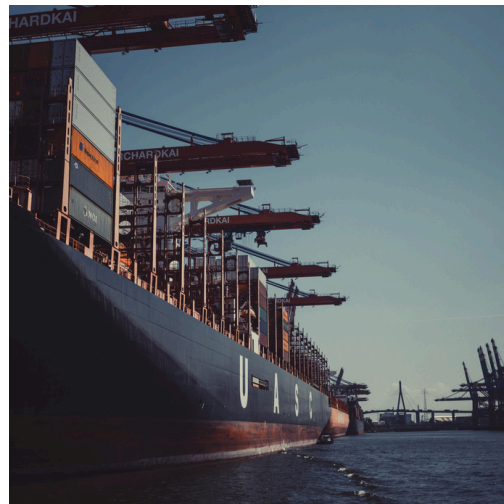

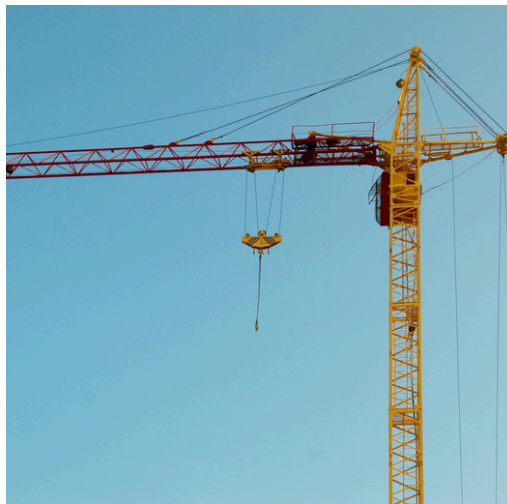

“Aii was a unique organization that provided very diverse experiences. It gave me a solid footing to build a career in public policy.” **Chanil N. De Silva , former Senior Policy Analyst**

“Aii has strong leadership and a fantastic policy team. The organization prioritizes doing the extra work to understand the nuance surrounding complex infrastructure policy issues to educate their audience regardless of the reader’s depth of knowledge or experience in the subject matter.” **Shane Skelton , former Executive Director, Policy Advisor**

“Aii is a leader in infrastructure policy and a respected voice in Washington DC.” **Kevin Gluba, Advisory Council**
